

## Change The Color of Light to Expand Your Possibilities!

GWU-Lasertechnik expands the **primoScan product line** with a new 532 nm-pumped version. Leveraging its **modular design**, the primoScan now supports pump energies up to 750 mJ, **delivering market-leading, tunable near-infrared (NIR) output with exceptional ultra-low divergence (ULD) beam quality.**

- ✓ **Highest Nanosecond Pulse Energy**
- ✓ **Shot-to-Shot wavelength tunability**
- ✓ **Robust and reliable all-solid-state design**
