Your partner for industrial

High reliability and a wide range of applications. Nowhere are the requirements as diverse as in the industrial sector. At the same time, robustness, safety and quality are required. From mechanical and plant engineering to energy and environmental technology, our experts know the right components for your industrial application.

Your advantages

- 1** Variety of sizes and geometries
- 2** High thermal, chemical and mechanical resistance
- 3** Wide range of body and seal materials
- 4** Quality for maximum work and process safety
- 5** Customized solutions

We master demanding tasks

Whether offset or digital printing – optimized ink supply for best results

Printing systems must work quickly, reliably and cleanly. Our distribution blocks, push-in fittings and solenoid valves provide perfect ink management and impress with their durability.

Economical and ecological – professional industrial water treatment

Hardly any industrial production process works without water. Our robust and compact GAMMA membrane valve convinces with its long service life and impact-free operation.

Forming, cutting, joining, coating – precision by laser technology in production

Lasers are used in many industrial manufacturing processes. Our products meet the high requirements of laser technology and stand for fitting accuracy, tightness, purity and durability.

Connecting

Push-in and push-on fittings, tubes and non-return valves

Controlling

Dispensing valves, solenoid valves and function fittings

Measuring

Conductivity, pressure and temperature sensors

Transferring

Electro-pneumatic dosing pumps and external gear pumps
