

Laser Zentrum Hannover e.V. (LZH)

LIGHT FOR INNOVATION

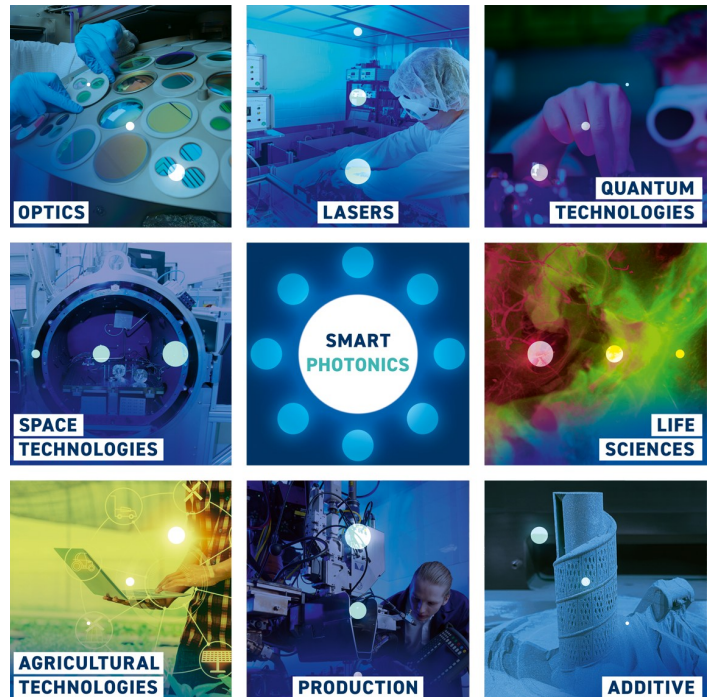

As an independent non-profit research institute for photonics and laser technology the Laser Zentrum Hannover e.V. (LZH) stands for innovative research, development and consulting. The focus of our applied research is on **smart photonics**. Our eight innovation fields stand for the future topics of photonics and laser technology. In these areas, we identify and initiate trends and thus contribute significantly to the further development of science, business and industry.

Interdisciplinarity is thereby strongly emphasized since the foundation 1986 and is the basis of the excellent work at the LZH. As a reliable partner of the industry, we constantly focus on the customer benefit and use **Light for Innovation**.
