

## Press Release

### Satisloh launches new micro optics solutions at Laser World of Photonics

**BAAR, Switzerland, and Munich Germany June 14, 2019** – [Satisloh](http://www.satisloh.com), a global leader in manufacturing solutions for both precision optics and ophthalmic markets, will showcase its latest innovation for security, defense technology, medical, and laser applications at Laser World of Photonics 2019 Munich, 24-27 June in Hall B1, Stand 503.

Recognizing the ever-increasing demand for precise and accurate micro optics manufacturing, Satisloh is launching the **SPM-10** and **SPS-10**: two new solutions that extend the grinding and polishing production capabilities to include complex, small lenses and micro optic aspheres. The **HS-30**, an integrated handling system for Satisloh micro optic machines that increases manufacturing productivity for lens processing, will also be shown at the booth.

Dr. Jürgen Bode, head of Satisloh's Precision Optics Business Unit, stated: *"The launch at Laser World of Photonics demonstrates our commitment to innovation in hardware and software solutions which enables our customers to reach maximum process flexibility and cost efficient production of optical components down to the millimeter range and to track in real-time what is happening in their production facilities."*

Don't miss Dane Clarke's interesting lecture about the challenges and solution approaches in thin-film coating for polymer optics, on Monday, June 24 - 11:20 am, booth B3.361.

At Hall B1, Stand 503, visitors can learn more about Satisloh's complete product line and talk to our experts who will share their knowledge and recommendations for solutions that ensure outstanding performance.

For more information about Satisloh's precision optics solutions and services visit [satisloh.com](http://www.satisloh.com).

#### About Satisloh

Founded in 1922, Satisloh, is a global leader in manufacturing solutions for the ophthalmic and precision optics markets. Satisloh offers a full range of machines, software, consumables, tools, services and process solutions used by manufacturing companies for ophthalmic lenses, medical instruments, camera objectives, semiconductor lithography as well as aerospace equipment. The company provides customized cutting edge solutions for surfacing, centering, polishing, coating and finishing to help their customers increase lens production quality and manufacturing productivity. Satisloh employs more than 900 people in 17 countries around the world. Corporate headquarters are located in Baar, Switzerland

with regional offices and service centers across Europe, Middle East, North and South America and Asia.
